

RESEARCH DOCUMENTATION LATEX WORKSHOP

LaTeX workshop is primarily meant for all researchers in various disciplines. A researcher needs to bring out the quality of his / her work by publishing papers in peer reviewed journals. These journals expect the papers in LaTeX format. LaTeX is an extremely powerful typesetting language for creating structured documents. It is well suited for documents containing mathematics and also for any other kinds of documents like circular, letter, reports, books, so on. LaTeX provides a facility for portable document format (pdf) and post script (ps) type of output.
